

BORIS ALEKSANDROVICH KAZANSKII

Dear Boris Aleksandrovich,

The Editorial Board of "Uspekhi Khimii" conveys to you their sincere greetings on the occasion of your 70th birthday and the 45th anniversary of the start of your scientific career.

Your studies on the chemistry of hydrocarbons and their catalytic reactions, elegant in conception and brilliant in precision of execution, have become part of the golden treasury of organic chemistry. Your love of chemistry, wide knowledge of chemical literature, mastery of experimental techniques, and conscientiousness, in the deepest sense of the word, are always an example for us all.

The many years of your work on our Editorial Board have been invaluable both to the Journal and to many of its readers.

We wish you, dear Boris Aleksandrovich, many happy returns, good health, and new scientific successes.

The Editorial Board of
"Uspekhi Khimii"
