Uspekhi Khimii

September 1969

DEAR ALEKSANDR NIKOLAEVICH!

The editorial board and editorial staff of "Uspekhi Khimii" (Russian Chemical Reviews) offer you their sincere congratulations on the 70th anniversary of your birth and 45 years of outstanding scientific, pedagogic, and social activity.

Your brilliant studies in the field of the chemistry of organoelemental compounds are widely recognised in the Soviet Union and abroad. You have also made an invaluable contribution to other branches of chemical science, particularly in theoretical and experimental organic chemistry. Your many-sided research activities have laid the foundation for a new branch of chemistry—the chemistry of synthetic and artificial foodstuffs.

A characteristic feature of your research work is that your studies combine a high theoretical level with practical aims and are constantly concerned with the requirements of the national economy.

Aleksandr Nikolaevich, we wish you good health, happiness, and continued fruitful activity for the good of your native land and for science.

The editorial board and editorial staff of "Uspekhi Khimii"
