Grigorii Alekseevich Razuvaev

GRIGORII ALEKSEEVICH RAZUVAEV

DEAR GRIGORII ALEKSEEVICH,

The Editorial Board and the Editors of the Journal "USPEKHI KHIMII" convey to you their heartfelt greetings on the occasion of your birthday.

As a scientist of world renown, teacher, and scientific organiser, you have enjoyed enormous authority in the scientific community of our country and abroad.

You have rendered invaluable services in the creation of the Gorky School of Chemistry and in the development of the chemistry of free radicals and organometallic compounds.

Your name is closely associated with the Gorky State University where you have been Head of the Department of Organic Chemistry for more than a quarter of a century and where you have trained more than one generation of organic chemists. Your numerous former students are engaged in the successful development of fundamental research in the Research Institutes and industrial undertakings of the Soviet Union.

For a long time you have directed the Institute of Chemistry at the Lobachevskii Gorky State University and you have laid the foundations of the close relationship between science and industry.

You have been the organiser and the permanent director of the first institute of the USSR Academy of Sciences in the city of Gorký. This institute, where important scientific and practical problems have been solved, soon occupied an honourable place among the academic institutes of our country. Your services to Soviet science have been highly rewarded. Your have been the laureate of the Lenin Prize and have received State Prizes twice. The Soviet government has granted you the honorary title of Hero of Socialist Labour and has rewarded you with three Orders of Lenin.

We wish you, dear Grigorii Alekseevich, good health and new creative successes.

The Editorial Board and the
Editors of the journal "Uspekhi Khimii"
